10:45-10:55	Discussion Dr. Anil Abraham Joy
10:55-11:00	Wrap up and Evaluation

## OBJECTIVES

### **Cardio-Oncology**

- Identify patients at risk of cancer treatment related cardiac toxicity
- Recognize signs and symptoms of treatment related cardiac complications
- Implement treatment plan for patients with treatment related cardiac toxicities.

### **Review of HPV in GI and Head & Neck Malignancies**

- Evaluate the role of viruses in the development of GI and head & neck malignancies
- Explain treatment options and toxicities in GI and head & neck malignancies

### **Fertility and Adjuvant Endocrine Therapy in Breast Cancer**

- Identify most appropriate adjuvant endocrine therapy in treatment of early stage breast cancer
- Recognize the implications of adjuvant endocrine therapy on fertility
- Summarize the role of bilateral salpingo-oophorectomy in premenopausal women with early stage breast cancer

### **Hallmarks of Happiness-Oncologist's Perspective on an Evidence Based Approach to Wellbeing**

- Recognize the importance of personal emotional wellbeing while caring for cancer patients
- Identify risk factors for burn out and compassion fatigue
- Formulate an approach to physician wellness
